1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the control of the transistor as a function of the current as recited by independent claims 22 and 30 must be shown or the feature canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Claims 21, 25, 29, and 33 are objected to because they recited that the indication signal is the on-time or off-time duration of Vds in a present cycle which is in direct conflict with the recitation in parent claims 2, 23, 27, and 31 that the indication signal is the on-time or off-time duration of Vds in a previous cycle.

Appropriate correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 4, and 21-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Yee (US 6,055,170).

Yee discloses a transistor rectifier circuit comprising a transistor (170 or 188 or 208) and a control circuit (172 or 190 or 210) functioning as illustrated in figure 9.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

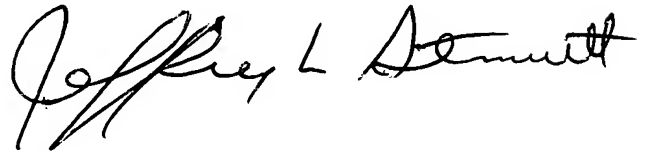

Fujisawa (US 6,324,084), Haneda (US 6,430,071), Yang (US 6,839,248), and Herbert (US 6,992,906) are cited to show transistor rectifier circuits old and known in the art at the time of the invention.
